02. Solution

03. Results

Entire Head Office relocation.	Utilised Cloud to provide centralised, location-independent IT services.	Head Office move occurred smoothly over one weekend. Users are now able to access IT systems from anywhere with an Internet connection.
Ageing systems resulting in slow delivery of services to end users and high IT administration overhead.	Re-architected IT systems with latest technologies.	Improved accessibility and usability of IT systems for end users.
Systems nearing capacity restricting ability to introduce new technology solutions.	Moved IT services to the Cloud for scalable resources.	Cloud provided the ability to grow IT resources organically as the organisation grows.
Small scale business continuity and disaster recovery solution.	Architected Cloud based disaster recovery solution.	Introduced enterprise grade business continuity and disaster recovery systems to prevent data loss and provide operational BAU systems in the event of disaster.
Disparate IT systems and user workstations.	Reduced IT infrastructure footprint and created standardised desktop environments.	Reduced IT overhead and improved user experience by standardising desktop environments.
